

Soldering Iron Tip Cleaning Fluid

DESCRIPTION

Almit Soldering Iron Tip Cleaning Fluid is an aqueous based, non flammable soldering iron cleaning and preservative chemical. It has been specially formulated for the cleaning and preservation of iron plated soldering iron tips. It is equally suited to manual or automatic tip cleaning processes and is compatible with both lead containing and lead free cored solder wires. Almit Soldering Iron Tip Cleaning Fluid contains no halides and also is not subject to special storage requirements. The aqueous based formulation prevents evaporation at the workplace and eliminates VOC emissions which contribute to global warming.

USES

Almit Soldering Iron Tip Cleaning Fluid should be applied to individual soldering station cleaning sponges or to cleaning fluid reservoirs of automated equipment. If the fluid should become frozen during storage, simply bring back to room temperature and shake the container to ensure the constituents are fully mixed.

FEATURES

BENEFITS

Active Ingredients

More effective than plain DI Water

Aqueous Based

Low Evaporation rate

Non Flammable

No Fire Hazard

CHEMICAL / MATERIAL PROPERTIES

Flash Point	None
Odour	None
Colour	Clear Liquid
Solids Content	4.5% w/w
Acid Value	30.0
Specific Gravity	1.015 @ 25°C

AVAILABILITY

Almit Soldering Iron Tip Cleaning Fluid is available in 1 and 5 litre plastic containers.

1 Litre Container	Part Number	8 95 710 01
5 Litre Container	Part Number	8 95 710 05

HEALTH AND SAFETY

Consult Material Safety Data Sheet for detailed information on handling and hazards.
